Why video is IVAI's fastest growth lever.

A short brief on how we are creating videos and content for IVAI, why it matters right now, and what the new 3-minute video workflow unlocks for the brand.

Why this matters for IVAI

Short-form video is the single highest-leverage content format on every channel IVAI cares about — Instagram, TikTok, YouTube Shorts, and paid social. Video drives 3–5× the engagement of static posts, shortens the path from awareness to booking, and gives the brand a consistent on-screen identity that text and photography cannot match.

For IVAI specifically, video lets us **show the transformation** — the cut, the color, the room, the people — in a way that converts scrollers into clients. It is also reusable: one shoot fuels weeks of organic posts, paid ads, website hero loops, and email assets.

“The 3-minute video creation workflow means a finished, on-brand spot in the time it used to take to write a caption — turning IVAI into a daily publisher instead of a quarterly one.”

The 3-minute video creation workflow

We've built a pipeline that takes a raw idea to a published, on-brand IVAI video in roughly three minutes. This is the unlock — speed at brand quality.

0:00 → 0:30	0:30 → 1:30	1:30 → 2:30	2:30 → 3:00
Brief & prompt	AI generation + b-roll	Brand polish & captions	Review & publish

What this changes for the business

- Volume.** We can ship a fresh spot every day rather than once a quarter — keeping IVAI top-of-feed and top-of-mind.
- Cost.** The marginal cost of an additional video drops to near zero, so we can A/B test creative instead of betting on one cut.
- Responsiveness.** Trends, promotions, and seasonal moments can be turned into branded content the same day they appear.

- **Brand consistency.** Every spot is generated against the same IVAI look — type, palette, pacing — so the feed always reads as one brand.

What we're producing for IVAI

Asset	Length	Use case
IVAI Commercial (hero)	30–45s	Website hero, paid social top-funnel
IVAI Spot 60s	60s	YouTube pre-roll, Meta & TikTok ads
IVAI Evolve	20–30s	Brand story / about-page loop
IVAI No-Show	15–20s	Retention & booking-policy reminder

The recommendation

Lean in. The 3-minute pipeline is already producing the four active IVAI spots in rotation today. With sign-off, we'll scale to a weekly publishing cadence across IG, TikTok, and YouTube — and start running paid creative tests against the existing hero spot to find IVAI's highest-converting format.

Next steps

- Approve weekly publishing cadence (4–6 spots per month).
- Greenlight a small paid-social test budget against the 60s spot.
- Confirm brand guardrails so the team can ship without per-asset review.
